

NPIC/TSSG/DED-1608-69
6 May 1969

MEMORANDUM FOR: Chief, Technical Services & Support Group, NPIC

SUBJECT : Disposition of [] Processor

1. As a result of pre-acceptance testing at the Contractor's plant during April 1969, it was determined that the [] principle for processing film was impractical and that further time and effort spent would be useless.

2. It is our recommendation that the processor be shipped to Franconia for storage in [] until a recipient can be found or until salvage action is initiated.
